ABOUT US · HUAQI ZHENG BANG

ZHEJIANG HUAQI ZHENG BANG AUTOMATION TECHNOLOGY CO., LTD.

Zhejiang Huaqi Zhengbang Automation Technology CO., Ltd. (Wenzhou Zhengbang Electrical Equipment CO., Ltd.) is founded in 2007, focusing on developing, design, manufacturing and sales automatic manufacturing devices and electronic production equipment.

The company supplies professional and individual solutions for LED lighting, electronic, electrical products, toys, metal, cars. Major products are LED lighting automatic assembly lines, THT soldering device, SMT soldering machines and multiple working tables and non-standard equipment. Major products are LED bulb automatic assembly lines, flood lights assembly lines, downlights assembly lines, THT soldering equipment, SMT soldering device, working table and non-standard customized machines.

Huaqi Zhengbang has big scale market covering 30+ province and districts inside of china and 30% products are selling to Hongkong, Taiwan, Southeast Asia, Africa, Europe, and America. Huaqi Zhengbang believes "Qualified Base, Market Leading, Technical Development, Profitable Management" company role in order to improve core competitiveness, providing qualified service to most clients with "Qualified Products, Reasonable Pricing, Excellent Reputation and full range after-sale service".

COMPANY VISION: Contributing to create Chinese first brand in electronic and electrical production equipment.

SELECTION OF SMT MACHINE SERIES

WS-8Y

Model: WS-8Y Number of Mounting Heads: 8
 Feeder Slots: 70 Positioning Accuracy: 0.02mm
 Camera: Flying Camera PCB Size: 500×400mm
 Normal CPH: 16000 Motor/Drive: Servo System
 Mounting Head Structure: Ball Spline
 Transmission Main Shaft: Ground Screw + Linear Guide
 Control Configuration: Industrial Computer + 19" Display Screen

BC-6Y

Model: BC-6Y Number of Mounting Heads: 6
 Feeder Slots: 66 Positioning Accuracy: 0.02mm
 Camera: Flying Camera PCB Size: 500×400mm
 Normal CPH: 12000 Motor/Drive: Servo System
 Mounting Head Structure: Independent Direct Drive
 Transmission Main Shaft: Ground Screw + Linear Guide
 Control Configuration: Industrial Computer + 19" Display Screen

ZB4050LS

Model: ZB4050LS Number of Mounting Heads: 6
 Feeder Slots: 64 Positioning Accuracy: 0.02mm
 Camera: Fixed Camera PCB Size: 500×400mm
 Normal CPH: 11000 Motor/Drive: Servo System
 Mounting Head Structure: Swing Hip Drive
 Transmission Main Shaft: Ball Screw + Linear Guide
 Control Configuration: Industrial Computer + 19" Display Screen

ZB3545TP

Model: ZB3545TP Number of Mounting Heads: 4
 Feeder Slots: 38 Positioning Accuracy: 0.05mm
 Number of Cameras: 6 PCB Size: 350×450mm
 Normal CPH: 5000 Motor/Drive: Stepper Servo
 Transmission Main Shaft: Synchronous Belt + Linear Guide
 Control Configuration: Industrial Computer + 19" Display Screen
 Visual Correction: CCD High-Definition Camera
 + 4 Sets of Quick Cameras

ZB3245TSS

Model: ZB3245TSS Number of Mounting Heads: 2
 Feeder Slots: 54 Positioning Accuracy: 0.05mm
 Number of Cameras: 4 PCB Size: 320×450mm
 Normal CPH: 3500 Motor/Drive: Stepper Servo
 Transmission Main Shaft: Synchronous Belt + Linear Guide
 Control Configuration: Industrial Computer + 19" Display Screen
 Visual Correction: CCD High-Definition Camera
 + 2 Sets of Quick Cameras

ZB3245TS

Model: ZB3245TS Number of Mounting Heads: 2
 Feeder Slots: 27 Positioning Accuracy: 0.05mm
 Number of Cameras: 2 PCB Size: 320×450mm
 Normal CPH: 3000 Motor/Drive: Step Servo
 Transmission Main Shaft: Synchronous Belt + Linear Guide
 Control Configuration: Industrial Computer + 19" Display Screen
 Visual Correction: CCD Gaotao Camera

ZB3245T

Model: ZB3245T Number of Mounting Heads: 2
 Feeder Slots: 27 Positioning Accuracy: 0.05mm
 Number of Cameras: None PCB Size: 320×450mm
 Normal CPH: 4000 Motor/Drive: Stepper
 Transmission Main Shaft: Synchronous Belt + Optical Axis
 Control System: Built-in MCU + 7" Touch Screen
 Visual Correction: None

ZB3245T

Desktop Pick and Place Machine

ZB series placement machine main features: Small volume, easy operate, run stable and price affordable. They can mount 0402, 0603, 0805, 1206, 1210, 3528, 5050, SOP and QFN etc chips precise. These machines can help to avoid the unstable performance because of manual mounting and reduce the rent cost, improve the product capacity at the same time.

TECHNICAL PARAMETER

Model	ZB3245T	16 mm	2PCS
Mounting Numbers	2 PCS	24 mm	1PCS
Mounting Precision	0.05mm	Preposition IC Material Level	8PCS
Mounding Angle	0~360°	Tubular Materials Feeder	ZB Customized Feeder(Optional)
Theoretical Speed	4000	X/Y Axis Moving Range	410×490mm
Normal CPH	4000	Operational Software	Embedded HRM System
Nozzle Type	Juki Series Nozzle	Compatible File Format	CSV、TXT.format
SMD Height	≤5.5mm	Program Method	Support Online and Offline Ways
PCB Minimal Size	10×10mm	Air Pressure	0.4 Mpa
PCB Maximum Size	320×450mm	Vacuity Degree	-92kpa
PCB Thickness	≤2mm	Storage	8G(Kingston SD Card)
Type	27 types of ribbon materials: (8mm x 20 types, 12mm x 4 types, 16mm x 2 types, 24mm x 1 type) supports customization	Power	150W
8 mm	20PCS	Power Supply	AC220V±10% 50Hz
12 mm	4PCS	Main Engine Outline Size	L800×W780×H380mm
Applicable Element	RC (0603,0805,1206 etc) LED Lamp Beads (0603,0805,3014,5050 etc) Chip (SOT,SOP etc)	Materials Feeder Outline Size	L235×W700×H245mm
		Weight	50kg

ZB3245TS

Desktop Pick and Place Machine

The ZB series mounter is suitable for small and medium-sized enterprises' mass production, experimental development, sample trial production and school teaching and so on. The design concept of the machine is to meet the needs of the vast number of small and medium customers, with the rapid and accurate mounting, easy operation, stable running and affordable price. It has a very high performance-price ratio and is your best choice!

TECHNICAL PARAMETER

Model	ZB3245TS	X/Y Axis Moving Range	430 × 530mm
Mounting Numbers	2PCS	Z-Axis Rotation Angle	0~360°
Mounting Precision	0.05mm	Visual Camera	CCD High-definition Camera
Mounding Angle	0~360°	Numbers of Visual	Parts Camera × 1、PCB Camera × 1
Normal CPH	3000	Recognition Capability	MAX.22 × 22mm
Suction Nozzle Type	Juki Series Nozzle	PC System	Microsoft WIN7
SMD Height	≤5.5mm(Customize ≤11mm)	Operational Software	R & D
PCB Minimal Size	10 × 10mm	Compatible File Format	CSV. Format
PCB Maximum Size	320 × 450mm	Program Method	Support Online and Offline Ways
PCB Thickness	≤2mm	Air Pressure	0.4 Mpa
Type	27 types of ribbon materials: (8mm x 20 types, 12mm x 4 types, 16mm x 2 types, 24mm x 1 type) supports customization	Vacuity Degree	-92kpa
Front IC Location	10PCS	Power	150W
Back IC Tray	1PCS	Power Supply	AC220V ± 10% 50Hz
Vibration Feeder	ZB Customized Feeder(Optional)	Main Engine Outline Size	L830 × W730 × H375mm
Applicable Element	RC (0201,0402,0603,0805,1206 etc) LED Lamp Beads (0603,0805,3014,5050 etc) Chip (SOT,SOP,QFN,BGA etc)	Materials Feeder Outline Size	L235 × W470 × H245mm
		Weight	56kg

Stepping Servo Motor

Realize closed-loop control of position, speed, and torque Control and overcome the problem of stepping motor out of step

CCD industrial camera

High resolution CCD industrial dual camera, correcting material deviation, improving the reliability of mounting

Double mounting head mounting

Double head design, achieving fast mounting of small components and integrated IC components

Built in industrial computer

Embedded industrial control PC and Windows system, simple and convenient operation, stable performance

ZB3245TSS

Desktop Pick and Place Machine

The ZB3245TSS series mounter with 2heads ,can pick and place at the same time. Independent 54 feeder station, 19"Dell display, multiple sets of high resolution CCD industry dual camera vision.The transmission mechanism is equipped with high precision synchronous belt.and Linear Guideway, stepping servo motor.support CSV. document edit. Maximum PCB 320*450mm, suit for general resistance capacity

TECHNICAL PARAMETER

Model	ZB3245TSS	X/Y Axis Moving Range	430×530mm
Mounting Numbers	2PCS	Z Axis Rotation Angle	0~360°
Mounting Precision	0.05mm	Visual Camera	CCD High-definition Camera
Mounding Angle	0~360°	Numbers of Visual	Parts Camera×3、PCB Camera×1
Normal CPH	3500	Recognition Capability	MAX.22×22mm
Suction Nozzle Type	Juki Series Nozzle	PC System	Microsoft WIN7
SMD Height	≤5.5mm(Customize ≤11mm)	Operational Software	R & D
PCB Minimal Size	10×10mm	Compatible File Format	CSV. Format
PCB Maximum Size	320×450mm	Program Method	Support Online and Offline Ways
PCB Thickness	≤2mm	Air Pressure	0.4 Mpa
Type	54 types of ribbon materials: (8mm x 40 types, 12mm x 8 types, 16mm x 4 types, 24mm x 2 type) supports customization	Vacuity Degree	-92kpa
Front IC Location	10PCS	Power	230W
Back IC Tray	1PCS	Power Supply	AC220V±10% 50Hz
Vibration Feeder	ZB Customized Feeder(Optional)	Main Engine Outline Size	L990×W730×H375mm
Applicable Element	RC (0201,0402,0603,0805,1206 etc) LED Lamp Beads (0603,0805,3014,5050 etc) Chip (SOT,SOP,QFN,BGA etc)	Materials Feeder Outline Size	L235×W470×H245mm
		Weight	85kg

Stepping Servo Motor

Realize closed-loop control of position, speed, and torque Control and overcome the problem of stepping motor out of step

54 bit material stack

54 bit material stack, meeting diverse mounting requirements, supporting multiple feeders

Double mounting head mounting

Two sets of recognition camera designs to achieve high-speed recognition and inspection of mounted components

Built in industrial computer

Embedded industrial control PC and Windows system, simple and convenient operation, stable performance

ZB3545TP

Desktop Pick and Place Machine

It is with Multi-group industrial CCD camera solution, identification and correction system, 4 head pick and place at the same time. PC monitor, 19 inch Dell display. For the transmission structure, machine with HIWIN linear guider, Japanese belt, can achieve long term high precision and stable mounting. Maximum support 38 pcs of 8mm YAMAHA CL feeder stations. Also CSV, TXT coordinate file can be adopted. The maximum PCB size allowed: 350*450mm, normally it is used for normal resistance, capacitance LED, chips, BGA, etc. Mainly used for small production and prototyping business, with self-designed operating system for developers

TECHNICAL PARAMETER

Model	ZB3545TP	Z Axis Moving Range	12mm
Mounting Numbers	4PCS	Visual Camera	CCD High-definition Camera
Mounting Precision	0.05mm	Numbers of Visual	PCB Camera×1、 Precision Identification Camera×1、 High Speed Identification Camera×4
Mounding Angle	0~360°	Recognition Capability	MAX.22×22mm
Normal CPH	5000	PC System	Microsoft WIN7
Suction Nozzle Type	Juki Series Nozzle	Operational Software	R & D
SMD Height	≤6mm(Customize ≤11mm)	Compatible File Format	CSV. Format
PCB Minimal Size	10×10mm	Program Method	Support Online and Offline Ways
PCB Maximum Size	350×450mm	Air Pressure	0.8 Mpa
PCB Thickness	≤2mm	Vacuity Degree	Vacuum Generator
Feeder Type	YAMAHA CL Feeder	Air Pressure	-80kpa
Feeder	8mm,12mm,16mm,24mm,32mm	Power	500W
Feeder Locations	38 Feida hole positions	Power Supply	AC220V±10% 50Hz
Vibration Feeder	YAMAHA YV Feeder	Outline Size	L1185×W840×H560mm
IC Tray	Front 1 Piece	Weight	123kg
X/Y Axis Moving Range	655×575mm	Applicable Element	RC (0201,0402,0603,0805,1206 etc) LED Lamp Beads (0603,0805,3014,5050 etc) Chip (SOT,SOP,QFN,BGA etc)

Stepping+servo system

Step servo system was adopted to improve the machine reliability and never loose step.

CCD high-definition recognition camera

Multi-grouped industrial CCD camera solutions are adopted to improve efficiency and precision.

Upper silver slide rail+imported belt

HIWIN Linear Guide generates long term of high precise performance.

Four sets of fast recognition cameras

To improve the machine adaptability, it is adopted 4 head synchronous identification and mounting solution.

ZB4050LS (Rolling)
ZB4050LY (Grinding)

ZB4050 mounting machine adopted built-in WIN7 system industrial control computer, eight sets of high-resolution CCD industrial camera vision correction system, online 6-head synchronous calibration production placement.

The transmission mechanism is equipped with Panasonic high-resolution servo drive and motor, silver linear guide, and TBI ball screw to maintain long-term high-precision and stable placement. 64 PCS of YAMAHA pneumatic feeder station, support CSV coordinate file import and editing, maximum 500*400mm PCB placement. It is suitable for high-precision placement of conventional resistance, LED lamp beads, IC, BGA and other components, suitable for automated mass production.

VERTICAL VISION PICK AND PLACE MACHINE (6-HEAD)

TECHNICAL PARAMETER

Model	ZB4050LS/ZB4050LY	Width Adjustment Structure	Synchronous Belt + Linera Slide Rail
Mounting Numbers	6 Heads (Three-Head Simultaneous Pickup)	Width Adjustment Method	One Click Width Adjustment
Positioning Accuracy	0.02mm	Top Plate Structure	Top pin cylinder
Mounting Precsian	±0.05mm	Supported Types	Yamaha Pneumatic CI Model, Electric YV Model, Tube Feeder, etc.
Mounding Angle	0~360°	Supported Specifications	8mm,12mm,16mm,24mm,32mm,44mm etc.
Theoretical Mounting Speed	15000	Number of Component Positions	64 Positions
Normal CPH	11000	IC Tray Positions	2 Positions
Suction Nozzle Type	Juki Series Nozzle	X, Y-Axis Travel Range	639mm*656mm
Component Packaging	Tray Loading/Tube Loading/ Tray Packaging/Vibrating Tray	Z-Axis Mounting Stroke	15mm
SMD Height	≤6mm(Customize ≤12mm)	R-Axis Rotation Angle	0~360°
Component Dimensions	≤40mm(Customize Support)	Vision Camera	CCD High-Definition Camera
PCB Minimal Size	45×45 mm	Number of Vision Cameras	Mark Camera×1、 Precision Identification Camera×1、 High Speed Identification Camera×6
Maximum Board Size (Without Tray)	500×400 mm	Recognition Method	High-Definition Fixed Camera
Maximum Board Size (With Tray)	500×250 mm	PC System	Microsoft WIN7
PCB Thickness	≤2mm(Customize Support)	Operating Software	Self-Developed
Permissible Board Warpage	≤1mm	Compatible File Formats	.CSV.Format
XY drive system	Servo Drive + Motor	Programming Method	Support Online and Offline Ways
X drive Structure	Single-Drive Direct-Connected Dual Linear Guide Rail+ High-Strength Aerospace Aluminum	External Air Source	0.8Mpa
Y drive Structure	Single-Drive Direct-Connected Dual Linear Guide Rail+ High-Strength Aerospace Aluminum	Vacuum Generation Method	Vacuum Generator
XY Transmission Structure	Imported Ground Ball Screw + Imported Linear Slide Rail	Vacuum Value	-80kpa
Z-Axis motion Structure	Swing arm drive	Safety Protection	Feeder Lift Protection,Slow Down Or Stop When Cover Is Opened
A-Axis motion Structure	Independent Direct Drive	Upper and Lower Computer Interface	Standard SMEMA Connector
Conveying Structure	Aluminum Guide Rail	Power	Rated Power 1.5Kw, Working Power 0.35Kw
Conveying Motor	Drive-Control Integrated Stepper Motor	Power Supply	AC220V±10% 50Hz
Conveying Method	Three-stage Six-Drive	Mainframe Dimensions	L 1335 × W 1200 × H 1390 mm
Conveying Direction	L→R (Customize Support)	Weight	440kg
Compatible Components	Resistance and capatitance (0201, 0402, 0603, 0805, 1206, etc.), Led Lamp Beads,Diodes, Mos Tubes,Electrolytic Capacitors, Irregular Components,etc. Chips(SOT,SOP,QFN,BGA,etc.)		

BC-6Y

The BC-6Y placement machine uses an independent direct-drive structure for the mounting heads, supporting simultaneous pickup with 6 heads. It is equipped with Panasonic high-resolution servo drive and motor, imported linear guide rails, and imported ground ball screws, ensuring long-term high-precision and stable mounting. It features a built-in industrial computer, high-definition Ethernet flying camera vision correction system. With 56 feeder positions, it supports CSV coordinate file import and can accommodate PCB mounting up to 400*500 mm. Suitable for precise mounting of standard resistors, chips, irregular components, ultra-high devices, and extra-large components, it is ideal for automated mass production.

VERTICAL VISION PICK AND PLACE MACHINE (6-HEAD)

TECHNICAL PARAMETER

Model	BC-6Y	Width Adjustment Structure	Synchronous Belt + Linera Slide Rail
Mounting Numbers	6 Heads (Six-Head Simultaneous Pickup)	Width Adjustment Method	Automatic Width Adjustment
Positioning Accuracy	0.02mm	Top Plate Structure	Cylinder Tray + Movable Needle
Mounting Precsisian	±0.05mm	Supported Types	Yamaha Pneumatic CI Model, Electric YV Model, Tube Feeder, etc.
Mounding Angle	0~360°	Supported Specifications	8mm,12mm,16mm,24mm,32mm,44mm etc.
Theoretical Mounting Speed	21000	Number of Component Positions	66 Positions
Normal CPH	12000	IC Tray Positions	2 Positions
Suction Nozzle Type	Juki Series Nozzle	X, Y-Axis Travel Range	620mm*700mm
Component Packaging	Tray Loading/Tube Loading/ Tray Packaging/Vibrating Tray	Z-Axis Mounting Stroke	27mm
SMD Height	≤13mm(Customize ≤12mm)	R-Axis Rotation Angle	0~360°
Component Dimensions	≤40mm(Customize Support)	Vision Camera	Industrial Ethernet High-Definition Camera
PCB Minimal Size	45×45 mm	Number of Vision Cameras	Mark Camera X1、Flying Probe Camera X1
Maximum Board Size (Without Tray)	500×400 mm	Recognition Method	Flying Probe + High-Definition Fixed Camera
Maximum Board Size (With Tray)	500×220 mm	PC System	Microsoft WIN10
PCB Thickness	≤2mm(Customize Support)	Operating Software	Self-Developed
Permissible Board Warpage	≤1mm	Compatible File Formats	.CSV.Format
XY drive system	Panasonic Servo Drive + Motor	Programming Method	Support Online and Offline Ways
X drive Structure	Single-Drive Direct-Connected Dual Linear Guide Rail+ High-Strength Aerospace Aluminum	External Air Source	0.8Mpa
Y drive Structure	Single-Drive Direct-Connected Dual Linear Guide Rail+ High-Strength Aerospace Aluminum	Vacuum Generation Method	Vacuum Generator
XY Transmission Structure	Imported Ground Ball Screw + Imported Linear Slide Rail	Vacuum Value	-80kpa
Z-Axis motion Structure	Independent Direct Drive	Safety Protection	Feeder Lift Protection,Slow Down Or Stop When Cover Is Opened
A-Axis motion Structure	Independent Direct Drive	Upper and Lower Computer Interface	Standard SMEMA Connector
Conveying Structure	Aluminum Guide Rail	Power	Rated Power 1.5Kw, Working Power 0.35Kw
Conveying Motor	Drive-Control Integrated Stepper Motor	Power Supply	AC220V±10% 50Hz
Conveying Method	Three-stage Six-Drive	Mainframe Dimensions	L 1310 × W 1220 × H 1450 mm
Conveying Direction	L→R (Customize Support)	Weight	680kg
Compatible Components	Resistance and capatitance (0201, 0402, 0603, 0805, 1206, etc.), Led Lamp Beads,Diodes, Mos Tubes,Electrolytic Capacitors, Irregular Components,etc. Chips(SOT,SOP,QFN,BGA,etc.)		

WS-8Y

The WS-8Y placement machine features a ball spline structure for the mounting heads, supporting simultaneous pickup with 8 heads. The transmission mechanism is equipped with Panasonic high-resolution servo drive and motor, THK linear guide rails, and THK ground ball screws, ensuring long-term high-precision and stable mounting.

The conveying structure adopts super-flat aluminum guide rails, and the three-stage six-drive conveying mechanism ensures smooth and stable board transfer. It includes a built-in industrial computer and a high-definition Ethernet flying camera vision correction system. With 70 feeder positions, it supports CSV coordinate file import and can accommodate PCB mounting up to 400*500 mm.

Suitable for precise mounting of standard resistors, chips, irregular components, ultra-high devices, and extra-large components, it is ideal for high-speed automated production requirements.

VERTICAL VISION PICK AND PLACE MACHINE (8-HEAD)

TECHNICAL PARAMETER

Model	WS-8Y	Width Adjustment Structure	Dual Ground Ball Screws + Linear Slide Rail
Mounting Numbers	8 Heads (Eight-Head Simultaneous Pickup)	Width Adjustment Method	Automatic Width Adjustment
Positioning Accuracy	0.02mm	Top Plate Structure	Cylinder Tray + Movable Needle
Mounting Precision	±0.05mm	Supported Types	Yamaha Pneumatic CI Model, Electric YV Model, Tube Feeder, etc.
Mounting Angle	0~360°	Supported Specifications	8mm,12mm,16mm,24mm,32mm,44mm etc.
Theoretical Mounting Speed	30000	Number of Component Positions	70 Positions
Normal CPH	16000	IC Tray Positions	1 Positions
Suction Nozzle Type	Juki Series Nozzle	X, Y-Axis Travel Range	630mm*700mm

Compatible Components	Resistance and capacitance (0201, 0402, 0603, 0805, 1206, etc.), Led Lamp Beads,Diodes, Mos Tubes,Electrolytic Capacitors, Irregular Components,etc. Chips(SOT,SOP,QFN,BGA,etc.)		

Solder Paste Mixer

ZB500S Automatic Solder Paste Mixer makes solder cream move downward constantly through centrifugal force generated by revolution and cooperation with energy from rotation at 45 degree angle of axis of revolution. Solder cream located in the tank bottom makes upward movement from the surrounding, which forms a tornado-funnel shaped stirring action, and it can stir, soften and defoam the solder cream with appropriate viscosity. Solder cream has good wettability, even diffusivity, excellent printing effect after mixing, which achieves the best welding performance when reflowing soldering.

Specification

Model	ZB500S	Rated Power	Constant Speed 60W
Operating Speed	Motor Speed: 1350RPM	Working Power Supply	AC 220V±10% 50Hz
Operational Capability	0~500g*2Tanks	Outline Size	L400×W400×H500mm
Time Setting	0.01s~99h99s, Minute and Second Set	Weight	45kg
Display Mode	LED Digital Display	Acceptance of Solder Cream Pot	Tank diameter Φ60-Φ67 standard configuration (suitable for general 500 g solder cream bottle)

Silk Screen Printing Table

ZB3040H high precision stencil printer is mainly designed for the requirement of the single or double-side PCB soldering paste and red glue printing, the working platform is processed by cellular positional hole with high-quality aluminum and the pedestal is soldered by thick steel plate, steadiness and durability.

Flexible Positioning

Angle Adjustable

Specification

Model	ZB3040H	Size of Workbench	300×400mm
Max. Printing Size	250×400mm	Max. Stencil Size	370×470mm
Vertical and Horizontal Adjustment Volume	10mm	Thickness of Printing Matter	0~80mm
Repeatability Precision	±0.01mm	Location Mode	Shape or Benchmark Hole
Outline Size	L540×W370×H380mm	Weight	23kg

Solder Paste Printer

The main frame of ZB series semi-automatic solder paste printing machine adopts rigid structure, and the universal honeycomb cast aluminum table top realizes precise positioning of single-sided and special-shaped plates with high repeatability. The whole machine adopts PLC control system, Omron sensor and full color touch screen. The system is more stable and easy to operate. This product is suitable for solder paste and red glue printing on circuit boards, and is an indispensable equipment in the production process of SMT automated production line.

Repeat Precision	±0.05mm	Power Source AC220V±10% 50Hz
Compressed Air	8Kgf/cm ²	Power 100W
Work Altitude	130mm	

Micro Board Loader

Micro PCB loading machine is used for PCB feeding at the beginning of SMT production line, with a small footprint, Easy to use and other advantages.

The circuit board can be placed directly without the need for a turnover rack for storage and delivery. The operation panel adopts True color touch screen, intuitive operation.

Triple screw width adjustment

Self assembling material rack

Color Screen Touch Operation Model

SMEMA Standard Signal

Specification

Applicable PCB board size (MM)	450* (50-250)
Applicable PCB thickness	0.6-3.0mm
Body size L * W * H (MM)	500*600*1500
Whole body weight	90KG
Source	AC:~220V±10% 50HZ
Starting power/no-load power	0.2kw
Operation control	Seven inch full-color touch screen
Fixed edge	Front fixation (can be customized as rear fixation)
Transmission direction	Regular left to right (or can be customized as right to left)
Transfer height	900±20mm

Automatic Unloader

Automatic Loader

PCB Loader and Unloader

The ZB series loader and unloader is used for PCB transfer at the beginning of SMT production line and PCB receiving and storage at the end of production line to the PCB rack. This machine adopts PLC programmable control system with ball screw, and the whole machine runs stably and accurately. The operation control panel adopts a true color touch screen, which is intuitive and easy to use. It is suitable for repeated transportation of single-sided or double-sided circuit boards, which greatly reduces labor costs and improves efficiency.

ZBHW330 reflow soldering adopts infrared radiation heating, which is suitable for the production of small batches of single circuit boards. ZBRF530, ZBRF630 and ZBRF830 reflow soldering all use stainless steel heaters which are resistant to high temperature and corrosion, combined with the hot air circulation system to make full use of heat, rapid heating and high thermal efficiency. Accurate and stable temperature control, suitable for SMT small and medium batch production welding.

Temperature Control	Indoor Temperature~400 Degrees			

Hot air Eight Temperature Zone Rail Type Reflow Soldering

Hot air Twelve Temperature Zone Rail Type Reflow Soldering

Rail Type Hot Air Reflow Oven

ZBRF series Online reflow oven supports two transmission modes: mesh and conveyor, and can be connected to the pick and place machine and the PCB loader and unloader machines to realize automatic welding. This series of products have the characteristics of high efficiency, connectivity, and low investment.

The heaters use of high-efficiency and energy-saving finned heating tubes, combined with the hot air circulation system, makes full use of the heat evenly distributed, and improves the welding effect. The split fume exhaust furnace is more effective to eliminate the fumes generated during the welding process.

TECHNICAL PARAMETER

Edge wrapping and anti scalding

Aviation aluminum heating plate

Double row heat dissipation holes

The ZBJRT series heating table is a controlled heating equipment with stable temperature, suitable for any situation that requires stable temperature control heating. It is easy to operate, fast, and efficient, making it a good helper for your production and processing.

This machine adopts efficient heating tube multi tube technology combined with high-quality aluminum plate as the heating element. The heating tube is easy to replace, the heat transfer is uniform, and the conduction efficiency is extremely high. The temperature is intelligently controlled by PID, which is accurate, intuitive, and aesthetically pleasing.

PCB Splitter

The PCB Separator can further improve the quality of PCB separate. It is suitable for cutting all kinds of PCB, SMT board, aluminum substrate board, LED board and LED light bar with V groove, Import high speed steel blade, long life span, It mainly applies to LED industry, SMT industry, mobile phone /MP3 industry, electric toy sweat, various electronic industry, and other industries using circuit boards.

Specification		
Model	ZB906L	ZB908L

Resistance Forming Machine

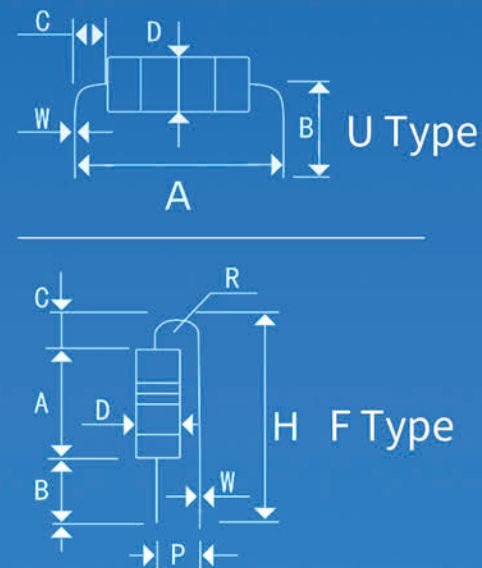

The ZB101U/ZB101F hand cranked resistance forming machine is mainly used as a specialized equipment for cutting and bending the pins of electronic components such as axial braided resistors, capacitors, inductors, diodes, etc. into horizontal (U-shaped)/vertical (F-shaped) assemblies. This machine is made of high-precision parts and high-quality materials. Its action principle is that a pair of cutting gears and cutting cutters act together to cut the component feet, and then a pair of forming gears and forming cutters complete the forming process.

Specification		
Model	ZB-101U	ZB-101F
A	6~40mm	4~18mm
B	3.6~15mm	2.5~20mm
C	1.2mm	3.5mm
D	1.5~8mm	1.5~8mm
W	0.35~1mm	
H	Not	25mm
P	Not	2.5~13.5mm

Notes: U type and F type is not the same one machine.

Spray Furnace

ZB Series flux spraying machine is the ideal machine that before PCB soldering ,operate simply and efficiently.

- Soldering flux is finer grains, atomization effect is more ideal.
- It's help to improve the flux activity.
- Soldering flux spray uniform, reduce spatter the tin effectively
- 304 stainless steel spray tank with anti-corrosion and not easy oxidation.

Specification

Soldering Pot

Lead-Free Soldering Pot

Tin Melting Furnace

What's the difference between B and D type?

B type is using 304 stainless steel material for tin tank, D's tin tank is using the military-grade titanium, D type is more anti-corrosion, high temperature resistant, longer life, B type is just for ordinary tin bar, but D type is apply to any types of tin bar, even for the lead, so the D type is more cost-effective.

Built-in High Precision Temperature Probe

Using PID(Micro-computer) Temperature Control System

Semi-Automatic Dip Soldering Machine

ZB series semi-automatic soldering machine use mechanical arm equipment to spray the scalding powder, PCB pre-heating, soldering, cooling, smoking and tin splash collection functions; It's apply to long and short plug-in elements and different PCB soldering requirement; soldering spot full, smooth, it's the cost-effective soldering equipment.

Automatic sensing spray

Heat-up Fast

Soldering Spot Full

PID Intelligent Temperature Control

- Newly automatic induction spray system, quicker and higher efficiency, no need manual operation.
- Using newly precision spray nozzle, spraying partical thinner and even, better atomization effect.
- High-efficiency pre-heat drying, speed up the circuit board scalling powder volatilize and activation of molecules, fully exert the scalling powder capability.
- Temperature controlled by the temperature control instrument, show the setting temperature and actual temperature at current time. Range of temperature control : Normal temperature -400°C. Main features: constant temperature ,precision and electric-saving.
- Discharging plate and cooling completed for only one time, forced cooling by super calm wind mechanism, equipped with exhaust device inside, which can delete the harmful gas produced in the process of soldering.
- Equipped with tin splash collection groove, which is convenient and save the cost through tin splash secondary reduction.
- Equipped with tin splash collection groove, which is convenient and save the cost through tin splash secondary reduction.

ZB200BF

Fully Automatic Wave Soldering

-  Zone heating
-  Efficient and energy-saving
-  Structure Compact
-  Orbital Transmission
-  Rapid Heating up
-  Automatic Synchronization

Control System

Using touch screen and microcontroller operation Simple and convenient, with higher stability

Modular preheating system

Adopting a drawer style structural design, Easy to remove for maintenance and repair

Using high-temperature long axis fans

New turbocharging technology, Improve the efficiency of hot air circulation

Using 316L stainless steel tin bath

TA1 Industrial Pure Titanium Impeller Has strong corrosion resistance and high temperature resistance

Anti oxidation cover

Can greatly reduce The oxidation amount of tin

Transport board system

Balanced and uniform transportation system

Spraying Systems

Adopting stepper motor, linear guide rail A100 nozzle reciprocating motion

High precision adjustment

Width adjustment through helical gears and high-precision trapezoidal gears Screw three-point synchronous width adjustment,

Cleaning System

By using anti-corrosion brushes to wash the claws on both sides, Automatic cycle cleaning of chain claws.

Operating power	3KW	Tin furnace type	External heating tin furnace	Low tin alarm method	Beep+text prompt	Allow minimum PCB size	MIN.50 * 130mm
Control system	Touch screen+PLC	Tin furnace structure	Independent modular	Tin impregnated chain claw	Double hook claw (alloy)	Allow maximum PCB size	MAX250 * 350mm
Production	MAX.2200PCS/8H	Tin furnace material	304 stainless steel/anchor alloy 6=2.0mm	Tin scraping method	automatic	Speed control mode	Touch screen control
Start stop mode	Tracking PCB board length start stop	Heating plate power	3000W * 2 pieces=6KW	Tin scraping drive mode	Reduction motor	Transportation method	Nickel plated 35B chain
Transmission mode	Mechanical rodless cylinder	maximum temperature	400 ° C	Scraping speed	160mm/s	Width adjustment method	Manual width adjustment
Spray pressure	0.25MPa-0.4MPa	Tin furnace capacity	70KG (Tin Bar 63/37)	Scraper quantity	Two sections side by side detachable	Cleaning agent	Alcohol
Spray form	Spray	Heating time of tin furnace	40min (set temperature 260°C)	Scraping cycle	1-50 adjustable times	Alcohol tank capacity	2.4L
Type of nozzle	A100-1.0 (Taiwan Wina)	Tin furnace control method	PID+SSR				
Flux storage tank	5.5L	Tin furnace timed on	Have				

TECHNICAL PARAMETER

PCB Pin Cutting Machine

ZB series cutting machine are apply to cut the extra pin after components and spares soldering, it's by the high precision process components assembled, grinding process at the key part, good cutting consistency, quick blade rotate speed , stable, low noise, high efficiency and convinent to operate. Double lead rails travel adjust same time and the height of wide cutting can be adjusted casually and cost-effective.

Imported bearings, high-precision

Wire cutting, blade saving

The whole machine is stable with little shaking

Exclusive technology, safer

Precision steel guide rail, more wear-resistant

Mass production, more reassuring

Specification

Model	ZB200E	ZB250E	Circuit Board Thickness	Approx 0.8~2.5mm
Lead Rail Stroke	0~220mm	0~280mm	Cut Foot Height	Approx 1.5~3mm
Blade Specification	Φ200×70×3.5mm	Φ250×70×3.5mm	Blade Speed	4500r/min
Outline Size	L615×W415×H780mm	L665×W475×H780mm	Power	550W
Weight	80kg	95kg	Power Supply	AC220V±10% 50Hz

Fully Automatic PCB Pin Cutting Machine

ZB250QE series fully automatic foot cutting machine. This model is currently a device developed for pin cutting in plug-in electronic products, mainly used to cut off excess pins after component welding. This machine is assembled from precision manufactured components. The key parts are ground, assembled with imported bearings, with good consistency in cutting feet, fast and stable blade speed, low noise, high efficiency, and easy operation. PCB boards are automatically transported through chains and can be connected to production lines or automatic immersion welding machines, with a high degree of automation and adjustable cutting height.

Precision craftsmanship

Pressure type claw

Linkage type width adjustment mechanism

Chain Conveyor

Specification

Model	ZB250QE	PCB conveyor height	750±20mm
Outline Size	L1000*W680*H900mm	PCB width	50-250mm
Weight	170KG	Substrate thickness	Approx 0.8mm-2.5mm
Power Supply	AC380V/50Hz	Blade Speed	4500 rpm
Power	0.7KW	Transportation speed	5-36mm/s
Control System	Touch Screen	Cutting foot height	Approx 1-3mm

ZBSRJ350 PCB Input Machine

Wave soldering input connected machine apply to THT plug in line and wave soldering connected machine combine together for input, which the features including the speed can be adjustable, low noise and easy to operate. The stainless steel materials chain design make this machine wearable and beautiful appearance.

The Chain Design

Synchronous Modulation

Stepless Speed Regulation

Regulation Mechanism

Specification

Model	ZBSRJ350
PCB Width	Max. 350mm
Transfer Speed	0~5000mm/min
Transport Motor	AC220V 50/60Hz 40W
Power Supply	AC220V 50/60Hz
Adjust Method	Hand Screw Adjusting
Outline Size	L1000×W655×H750~900(Adjustable)mm

ZBSCJ400 PCB Output Machine

Wave soldering output connected machine apply to THT plug in line and wave soldering connected machine combine together for output, which the features including the speed can be adjustable, low noise and easy to operate.

Stepless Speed Regulation

Axial Flow Fan

Connector

The Conveyor Belt

Specification

Model	ZBSCJ400
Belt Width	400mm
Transfer Speed	0~5000mm/min
Transport Motor	AC220V 50/60Hz 60W
Power Supply	AC220V 50/60Hz
Track Materials	Aluminum Alloy
Outline Size	L1400×W486×H940~1300(Adjustable)mm

Vertical

Desktop

Knife Grinder

ZB series sharpen machine is mainly use the blade of PCB cutting machine to grinding, this machine assembled by high precision components, excellent motor and diamond grinding wheel, convenient, efficient, the grinding angle can adjustable; Diamond grinding wheel speeding faster, stable, low noise, cutting feeder rail stable and so on.

Enclosed Design Safety and Health

Sharpen Smoothly, Low Loss

Micro-Adjust Control, High-Precision

Multiple Protection, More Secure

Angle Adjustable, Used Widely

High Temperature and High Pressure, Multiple Protection

Specification

Model	Sharpen Angle	Blade Size	Grinding Wheel Speed	Blade Speed	Power	Power Supply	Outline Size	Weight
ZB250FL	18°~25°	MAX. Φ250	2800R.P.M	25R.P.M	750W	AC 220V ±10% 50Hz	L630×W490×H950mm	90kg
ZB250FT							L630×W490×H350mm	70kg

Cutting Machine Blade

The selected material is the national standard tungsten steel grade (YG8), which is the best choice for rough machining tools. It can bring convenience to users with high production, high safety, and its quality meets international standards. Truly made of top-grade tungsten steel material, it remains basically unchanged even at a temperature of 500 ° C, effectively improving the quality of the blade, eliminating the worry of high-temperature annealing and extending its service life. Changing the traditional blade manufacturing technology, improving hardness and reducing brittleness, 5 senior experts in blade manufacturing have studied for 4 years to create the most durable cutting machine blade!

ZB Brand Tungsten Steel Blade

Mitsubishi tungsten steel blade

Zhuzhou Diamond Tungsten Steel Blade

Specification

	200	250
Model	200	250
Material	Tungsten steel	Tungsten steel
Specifications	8 inches	10 inches
Outer diameter	Φ200mm	Φ250mm
Inner diameter	Φ70mm	Φ70mm
Thickness	3.5mm	3.5mm

Long table assembly line

Aircraft-style assembly line
